

SUBHAN KASHIF

AI Engineer · LLM & Full-Stack Developer

subhankashif696@gmail.com | 0321-1017677 | Lahore, Pakistan | github.com/Subhan696 | linkedin.com/in/subhan-kashif-7a6109375

PROFESSIONAL SUMMARY

AI Engineer and Computer Science graduate who ships LLM-powered applications end to end. Built a production Retrieval-Augmented Generation (RAG) platform and LLM orchestration pipelines using LangChain, OpenAI, and vector databases, backed by full-stack engineering in React, Node.js, and Python.

TECHNICAL SKILLS

AI / ML: LLM Orchestration, RAG, Prompt Engineering, OpenAI & GPT-4o API, Embeddings, Vector Databases (Pinecone), Semantic Search, NLP, LangChain, LangGraph

Languages: Python, JavaScript (ES6+), TypeScript, Java, SQL, HTML5, CSS3

Backend: Node.js, Express.js, FastAPI, REST API Design, JWT Authentication

Frontend: React.js, React Native, Electron.js, Responsive UI, Component Design

Databases: PostgreSQL, MongoDB, SQLite, SQL Server, Mongoose, SQLAlchemy

Tools: Docker, Git & GitHub, Postman, Agile, OOP, Data Structures & Algorithms

EXPERIENCE

Trainee AI Engineer — Rabix Technologies, Lahore

Feb 2026 – May 2026

- Built multi-step LLM orchestration pipelines that automated repetitive internal workflows, reducing staff hands-on time.
- Improved LLM output relevance via prompt engineering and RAG over an internal knowledge base, reducing hallucinations.
- Integrated GenAI automation into existing tools through Python REST API services.

Junior Software Engineer (Internship) — Dev&Mark

May 2025 – Aug 2025

- Shipped full-stack features (React, Node.js/Express REST APIs) from requirement to deployment.
- Optimized PostgreSQL/MongoDB queries, added indexing, and refactored redundant API logic to improve speed and reliability.

PROJECTS

WhatsApp Business AI Sales Agent & CRM

June 2026

Python, FastAPI, LangGraph, LangChain, PostgreSQL, Node.js, Docker

- Autonomous WhatsApp sales agent: catalog search, pricing quotes, COD and bank-transfer checkout; cyclic LangGraph agent with PostgreSQL checkpoint, tool calling, and anti-hallucination controls.
- Mobile-responsive CRM dashboard (chat logs, order tracking, lead lifecycle); Dockerized FastAPI, Node.js bridge, PostgreSQL, Nginx with Certbot SSL via Docker Compose.

GradeWave — Smart Teacher Assistance Using NLP (Final Year Project)

Jul 2025 – May 2026

React, React Native, FastAPI, PostgreSQL, LangChain, OpenAI, Pinecone

- AI grading platform (3-person team) automating quiz generation, short-answer grading, and plagiarism detection.
- RAG pipeline (LangChain, OpenAI embeddings, Pinecone) for quiz generation; GPT-4o rubric-based grader; cosine-similarity plagiarism detection.
- React + TypeScript web app and React Native (Expo) mobile app on a unified FastAPI REST API with JWT and Google OAuth.

SecureHaven — Online Voting System

Jan 2024 – May 2024

React.js, Express.js, Node.js, MongoDB, JWT

- Secure voting platform with role-based access control, JWT auth, bcrypt hashing, duplicate-vote prevention, and a real-time results dashboard.

ATG Warehouse Management & POS Billing System

Jun 2024 – Oct 2024

Electron.js, React.js, SQLite, Node.js

- Offline-first cross-platform desktop app: inventory, purchase orders, POS billing, printable receipts, sales analytics, and low-stock alerts.

EDUCATION

B.S. Computer Science — COMSATS University Islamabad, Lahore | CGPA 3.12

Sep 2022 – Jun 2026

Coursework: Data Structures & Algorithms, OOP, Database Systems, Software Engineering, Web Technologies, Artificial Intelligence

Intermediate (FSc), Pre-Engineering — FC College, Lahore | Grade A

Sep 2020 – Jun 2022

Matriculation, Science — The Educators School, Lahore | Grade A*

Apr 2018 – Jun 2020

LANGUAGES

English — Full Professional Proficiency | Urdu — Native
